+			
Mobile Data Recording	Employee Self-Service	Workflow Optimization	Controlling + Reporting

# Set New Standards in Access Security

## ACCESS 5.0

Smart. Easy. Flexible.

In the age of “Industry 4.0”, state-of-the-art systems and “smart factories” stand for the automation of individually adjustable production processes and digital networking for integrating various systems.

### **Interflex takes a step further:**

Our intelligent solutions make the working world more convenient and secure. We connect systems AND communicate with users (e.g. employees, visitors and administrators) individually.

Access 5.0 stands for:

#### SMART

We have a suitable solution for your individual requirements.

#### EASY

Your employees will appreciate its user-friendliness and simple operation.

#### FLEXIBLE

Our solutions integrate a multitude of systems and components and provide you with maximum investment protection.

### **What tasks will we perform together?**

The employee situation in your company changes on a daily basis:

- New employees join, some leave the company
- Staff functions change
- Organizational descriptions change
- Relocations take place

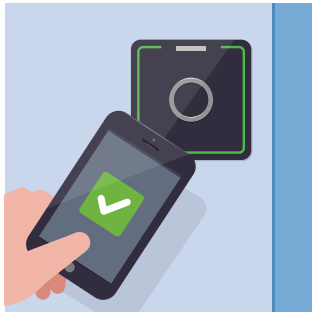

These tasks require adjustments to the access organization in your company. Delays are cost-intensive and have a negative impact on employee satisfaction.

Interflex sets new standards with its high-performance access solutions. With our IF-6040 software solution, you can operate more efficiently and ensure a constantly high level of security within your company.

We will be happy to explain how this can work for you on your site and regarding your company.

Interflex offers solutions for small, medium and world-wide operating companies.

With a holistic access control solution, you can meet all of your challenges.

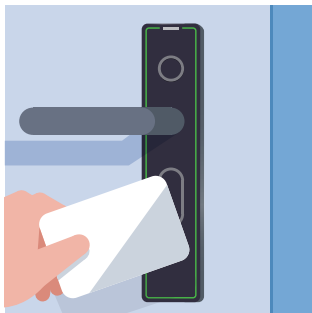

**Access via Smartphone**

- Smartphone serves as an access credential
- Open doors with BLE (Bluetooth Low Energy)
- Easily download employee credential as app
- Smartphone is connected to the access control system in a secure way

**Automatic Assignment of Access Permissions**

- Management of several dozen, hundreds or thousands of access permissions
- Control of who is granted access to which areas and when
- Modification of access permissions in case of job change, relocation or leave
- Automatic update of access permissions to include employee status changes
- Changes take effect immediately in real time
- Workload is taken off staff when it comes to the assignment of access permissions
- Guarantee of access security at all times

**Integration of Mechanical Door Locks**

- Extension of access control without wiring (online and offline)
- Suitable for all interior doors
- Integration into centralized access control system
- Transfer of access permissions via credential or wireless
- Convenient credential management
- Easy installation and initial operation

**Security Control Center Provides Customized Message Functions**

- Alarm situations are determined according to the security requirements
- Initiation of automatic measures
- Administrator receives a message in case of an alarm
- In dangerous situations, safety instructions are given to the staff over loudspeakers

**Further Software Functions**

	Bag search		Biometric recognition
	Elevator control		Locker and deposit systems
	Video surveillance		Parking lot and vehicle organization
	Live image comparison		Time & attendance recording
	Card production		Personnel scheduling

# State-of-the-Art Terminals - Your Guarantee for High Security

## eVAYO Terminal Generation

eVAYO stands for aesthetically appealing user interfaces, clear views and intuitive functions.

With respect to both function and appearance, each device is designed to fit perfectly into all system and operating environments – even in the most modern building complexes and structures.

## Battery-Powered Access Control

Offline access control is a very user-friendly, flexible and cost-effective security component. The terminals do not require wiring and offer a reliable and quick security solution.

Your benefit: Credentials that are already being used for existing access control and time recording systems can continue to be used.

These products are suitable for all interior doors, have a long battery life and can easily be controlled via your Interflex system.

## Biometric Recognition

Biometric technology significantly enhances company security. As opposed to PIN code or credential, biometric means of identification are:

never **lost**,  
never **misplaced**,  
and never **used for purposes other than intended**.

Interflex offers:

- Touchless 3D fingerprint recognition
- 2D fingerprint recognition
- Vein recognition

# interflex.

Interflex Datensysteme GmbH offers holistic solutions for workforce management including time management and personnel scheduling as well as customized and innovative security solutions including access control, video surveillance, security control centers, and visitor management.
